

A terminal window titled "Ubuntu 64-bit - VMware Workstation 14 Player (Non-commercial use only)". The terminal shows the command `grep -E "^S[^,]*, [^S]" People.txt > Output.txt` being executed. The prompt is `fdm@fdm-virtual-machine:~/Downloads/P1.1.1-resources$`.

Command: `grep -E "^S[^,]*, [^S]" People.txt > Output.txt`

Output File:

A file manager window showing a directory with several files: `CanPostcodes.txt`, `IPAddresses.txt`, `Output.txt`, `People.txt`, and `TextFile.txt`. The `Output.txt` file is selected. A preview window titled "Output.txt (~/.Downloads/P1.1.1-resources) - gedit" is open, showing the contents of the file:

```
Schmidt, Paul  
Smith, Peter
```

The status bar at the bottom of the gedit window indicates "Plain Text", "Tab Width: 8", "Ln 1, Col 1", and "INS".
